

Apteco FastStats Excelsior Course

Main Course Content

This self-directed course teaches delegates how to create reports that embed Apteco FastStats objects and can be updated dynamically with the latest results.

- Introduction – what it is and the software interface
- Viewing a Report – what the viewer licence allows you to do
- Working with Objects – which FastStats objects can be used
- Inserting Objects – how to embed your objects into Excel
- Excel as a display – using Excel to manipulate the data
- Refreshing the Report – how to rerun the FastStats objects
- Publishing a Report – distributing your report to FastStats/Non-FastStats users

Pre-requisites

Delegates must have completed the FastStats Base Standard user training before taking this course.

Although Excel is an integral part of this module the training focuses on the functionality of Excelsior and FastStats. You will need to use your own knowledge of Excel to produce the required standard of report.

This course is per person and you will receive a pack by post including, a manual and software launcher link that gives you up to 2 weeks to complete the activities. (Average time to complete the course is 2 to 3 hours.)
